Fall heights & advantages

Tested quality – that is our promise!

The use of shock-absorbent floor systems is necessitated by the requirements of DIN EN 1177:2018. This standard requires shock-absorbent flooring for a fall height of 60 cm or more. The suitability of Impact Protection Slabs made of bonded, permanently elastic recycled rubber granules is documented by a test certificate. The impact attenuation is tested using the HIC method.

All EUROFLEX® Impact Protection Slabs are tested in accordance with DIN EN 1177:2018+A1:2023 to determine the HIC value.

Tested Quality

ISO 9001 certified, Compliance with impact protection standards DIN EN 1177:2018+A1:2023

High sustainability

You can find all details on certifications and CO₂ savings in this brochure on page 50.

Integrated connector pins

secure slabs against accidental displacement and theft; time-saving installation

High anti-slip properties

due to granular structure; Water permeability prevents puddling

Great freedom for design

numerous standard and EPDM colours, multicolor, motifs, letters, numbers

Outstanding durability

frost-proof and rot-proof

High elasticity

for cushioning shocks / falls and for a pleasant walking sensation

Impact sound insulation

for a quiet environment

Full traceability

from raw material to finished product via production code stickers on each slab

Wide range of design elements

balls, half balls, cubes, diamonds, stepper, mushrooms, animals, etc.

Fall height [m] / slab thickness [mm]

Impact protection slabs

Highest safety performance since more than 40 years!

EUROFLEX® Impact Protection Slabs guarantee the highest safety standard on playgrounds – for the past 40 years. They allow children to romp about happily, without risk of injury. EUROFLEX® Impact Protection Slabs offer effective protection when children jump or fall to the ground by attenuating the impact and therefore reducing the risk of injury.

EUROFLEX® Impact Protection Slabs & edge and corner profiles made of recycled rubber granules

The shock absorption of EUROFLEX® impact protection slabs provides safety without sacrificing reliability and durability. Independent of weather or extreme temperatures children can always play carefree. EUROFLEX® impact protection slabs are TÜV approved according to DIN EN 1177:2018+A1:2023. Edge and corner profiles are significantly improving the safety around surfacing systems by reducing the danger of tripping. Another important benefit: They allow access with wheelchairs and pushchairs.

EUROFLEX® Impact Protection Slabs with letters, numbers and symbols

The EUROFLEX® letter and number slabs are ideal for designing playgrounds in schools, kindergartens and day care facilities and provide educational enhancement for all play and sports areas, as well as amusement parks. EUROFLEX® design slabs – alone or in combination with letter and number slabs – provide exciting design options. Areas with themes like e.g. farmhouse, star or sea can be created.

EUROFLEX® Impact Protection Slabs EPDM, Multicolor, Mulch

EUROFLEX® EPDM impact protection slabs enable unlimited colour design. They fulfill highest safety performance in accordance to DIN EN 1177:2018+A1:2023, provide personalized colour patterns and stimulate childrens' creativity. **The Impact Protection Slabs EPDM are available in all EPDM colours, Mulch is only available in the two colours shown below.**

EUROFLEX® Soft Touch

With EUROFLEX® Soft Touch, a stable, close-meshed grid is pressed into our tried-and-tested impact protection slab made of recycled rubber granulate, which has a smooth, soft surface. Typical areas of use are highly stressed, abrasion-sensitive areas on playgrounds, such as slide runs, swings or roundabouts. The board is also ideal for outdoor fitness, calisthenics or parkour.

EUROFLEX® Aqua Impact Protection Slabs

EUROFLEX® aqua impact protection slabs are suitable as shock-absorbing surface cover for water playgrounds and spray parks. These slabs combine the safety aspect with all the EPDM options shown on page 13. **It meets the standard DIN EN 1177, which mandates a certified fall height from total fall heights > 600 mm** (according to DIN EN 17232:2019 Water play equipment and features – Safety requirements, test methods and operational requirements).

Certified fall height 0.9 m, according to DIN EN 1177:2018+A1:2023
obligatory for total drop heights > 600 mm!

Anti-slip according to DIN 51097:1992-11,

The best of both worlds

EUROFLEX® impact protection slabs have been proving their worth for many years thanks to their high impact protection values for children's playgrounds. Although our EPDM impact protection slabs and their various designs already offer numerous design possibilities, there are still limits. With our new EUROFLEX® Visual System you can now print individual designs with pixel precision – in virtually any shape and size! From motifs such as stones, lawns, wooden floors, sea and jungle to your own logos, corporate design colours or lines, everything is possible!

Surfacing systems

For recreational and sports facilities

Safety is of utmost importance in recreational activities and sports. Modern surfacing systems for multipurpose sports facilities provide essential cushioning protection for players' joints and ligaments. They also provide other benefits: they can be played on under almost all weather conditions and reduce noise levels.

EUROFLEX® Sports Pavement Slabs

EUROFLEX® sports pavement slabs are highly compacted in manufacturing, giving them excellent abrasion resistance and outstanding ball rebound properties in accordance with DIN 18032 Part 2. Their high elasticity provides cushioning for players' ligaments and joints. The product is tested according to DIN EN 14877:2013 (European standard for plastic surfaces on outdoor sports facilities).

Sports Pavement Slab (for multipurpose areas)

other	pre-installed connector pins included

Also ideal for mobile applications!

EUROFLEX® Elastic Pavement Blocks & Paving Block Tiles

These products offer the familiar appearance of paving stones, but unlike concrete they are elastic and non-slip. Furthermore, they dry faster after rain. They are the ideal floor coverings for **footpaths in rehabilitation centres, day-care centres, retirement homes, hospitals, outdoor fitness parks and golf courses**. The elastic plaster is tested for „high stress“.

for balancing on balls, half balls, dice and on steppers

High resistance
against frost and weathering

Clear, natural design
Attractive, simple, stable shapes

High elasticity
minimizes the risk of injury during balancing and climbing on design elements

Many design options
numerous standard and EPDM colors, multi-color, motifs, letters, numbers

Make every playground an experience!

Whether in schools and kindergartens, amusement parks, sports facilities or playgrounds: EUROFLEX® design elements turn every play area into an experience. They offer children space for creativity and imagination and provide a wide range of play and movement options. These elements are not only enhancing your play space with individual and colourful design options but also compliment the EUROFLEX® impact protection slabs. Rubber as a material ensures a pleasant seat, dries quickly, is weather-resistant and soft.

EUROFLEX® Balls & Half Balls

EUROFLEX® Balls and Half Balls are highly successful design components for distinctively remarkable playgrounds. They are suitable for playgrounds, as well as seating or border elements in pedestrian areas. They are also perfect as climbing and balancing elements.

Balls and Half Balls

dimensions	Ø 345 / 500 / 695 mm
colours	standard: red/green/black/grey EPDM: see page 3
accessories	to be ordered separately: outdoor areas: metal tube 75 cm + adhesive indoor areas: metal plate 300 x 300 x 4 mm + adhesive

EUROFLEX® Turtle

The EUROFLEX® turtle has found its way from the vastness of the oceans to playgrounds and parks, where it shines with its colourful appearance.

The basic body is a hemisphere. This has cut-outs for attachments, which represent the head, limbs and the coloured spots of the shell. Thanks to this stable construction, the turtle is suitable for playing and as a place to sit.

dimensions base body Ø 700 mm

colour combinations **base body:** Dark blue RAL 5010

attachments: Red RAL 3016

accessories to be ordered separately:
metal tube 75 cm + adhesive

EUROFLEX® Caterpillar Head

The EUROFLEX® caterpillar head is a design element that can be used to combine half balls and balls to form a caterpillar. This element in combination with EUROFLEX® half balls and balls offer children seating accommodations and play opportunities. It can be extended by any number and size of EUROFLEX® balls or half balls. The eyes are already glued on, the feelers must be glued on after delivery. The caterpillar adds a friendly face to every playground.

Examples

Designed by Coryn Kempster and Julia Jamrozik

EUROFLEX® Trees and Rocks

This turns any playground into an enchanting little forest! The crowns of the trees are made of rubber mixtures in the colours of the seasons and can be put together in different combinations of crown size and stem heights. In this way, they offer a wide range of creative possibilities. The small forest is rounded off with the EUROFLEX® Rocks. Compared to their natural counterparts, these won't injure you in case of a fall.

Trees

dimensions	tree crown small: Ø 375 mm tree crown big: Ø 595 mm
crown colours	EPDM colours: green RAL 6021 and bright green RAL 6017 EPDM mixtures: Desert, Spring, Summer, Fall
stem heights	200 mm, 300 mm, 400 mm, 500 mm
stem colour	red
accessories	to be ordered separately: metal tube: • for tree crown 595 mm: 75 cm length • for tree crown 375 mm: 40 cm (for stem height up to 300 mm), 75 cm (from stem height 400 mm) optionally with adapter and adhesive, depending on the surface

Rocks

dimensions	Rocks small Ø 375 mm Rocks big Ø 595 mm
colours	EPDM colours: grey RAL 7038 EPDM mixtures: Winter, Urban
accessories	to be ordered separately: metal tube 75 cm + adhesive

EUROFLEX® animals and mushrooms

Imaginative play equipment or exciting seating options. They can be used for more than just play things but can be used also as little islands in playgrounds and kindergardens.

elephant, pony, dromedary, rhinocerus

dimensions L x W x H	elephant: 560 x 190 x 395 mm
	rhinocerus: 700 x 250 x 400 mm
	dromedary: 750 x 200 x 510 mm
	pony: 580 x 200 x 470 mm
	base plate: ø 700 mm
colours	EPDM: see page 3
accessories	to be ordered separately: outdoor areas: 2 metal tubes (30cm), optionally with 2 adapters and adhesive, depending on the substrate indoor areas: 1 base plate + adhesive

mushrooms

Ø stem	255 mm
height stem	200 / 300 / 400 / 500 mm
colour stem	red
Ø cap	450 mm
height cap	150 mm
colours cap	EPDM red, green, yellow, blue
accessories	to be ordered separately: Metal tube (30cm/40cm/50cm), optionally with adapter and adhesive, depending on the substrate

EUROFLEX® Cubes

EUROFLEX® cubes are highly successful design components for distinctively noticeable playgrounds. They are suitable for playgrounds, as well as seating or border elements in pedestrian areas. They are also perfect as climbing and balancing elements.

Cube (recycled rubber granules)

Cube EPDM

dimensions	300 or 400 mm side length, new with rounded edges
colours	300 mm: red/green/black/grey 400 mm: all colours (see page 3)
other	The cube can optionally be ordered with 2 integrated metal tubes (30 cm) for fastening

Peripheral components

Safety all over – even in the smallest details!

Although the playing surface is the obvious center of attention in playgrounds, sports and recreational facilities, it is not the only area where impact protection makes a difference. Edge and corner profiles are ideal to avoid trip hazards. Other borders can be used to define lawn areas or to cover hard concrete edges. Border elements can also be combined with balancing elements.

EUROFLEX® Modular Sandbox Edging & Stepper

Playing in a sandbox is one of children's favourite activities. The EUROFLEX® modular sandbox edging is the ideal supplement for separating the sandbox from the remainder of the playground. The soft rubber surface offers active all-round protection and protects children from painful and serious injuries (opposed to slippery and hard wooden or concrete sandbox edges). The use of separate retaining wall elements allows for a high degree of / design freedom regarding the shape and access for sand replacement machinery.

Steppers are balancing elements with 4 different heights for fitness and play areas. They promote balance and co-ordination skills in a playful way. The easy-to-install base socket provides stable support and facilitates installation and removal.

with internal steel reinforcement for extremely high stability

Modular Sandbox Edging

dimensions	1,150 x 150 x 300 mm
colours	red/green/black/grey
outside surface	smooth or textured
Sonstiges	double steel reinforcement guarantees excellent material stability of the pivot joints
accessories	to be ordered separately: anchoring poles 60 / 100 cm or plastic connectors 30 cm (free of charge), Cover plugs are supplied free of charge.

Stepper

diameter	Ø 255 mm
heights	200 / 300 / 400 / 500 mm
colour	red/green/black/grey
accessories	ground anchor with adapter (including screw-in bar and adhesive) to be ordered separately

EUROFLEX® Edge Protectors & Edge Protection Profile

The EUROFLEX® Edge Protectors and Edge Protection Profile easily eliminate all hazards caused by concrete edges and thus minimise the risk of injury in schoolyards, playgrounds and kindergartens.

Edge Protectors

dimensions 1.000 x 400 x 45 mm, leg 160 mm

colours red/green/black/grey

Edge Protection Profile

dimensions 1.000 x 120 x 90 mm
can be installed with the longer (8 cm) or the shorter (5 cm) leg on top

colours red/green/black/grey

other incl. double holes on both sides for plug connectors

EUROFLEX® Protective Edging & Perimeter Panels

The EUROFLEX® protective edging is used to cover the springs and frames of trampolines. It provides effective protection against dangerous injuries in the event of an impact on the edge area of the trampoline.

EUROFLEX® Perimeter Panels can be used to surround functional areas surrounded by concrete.

Protective Edging

dimensions 1.000 x 250 x 50 mm

colours standard: red/green/black/grey
EPDM: see page 3

Perimeter Panels

dimensions 1.000 x 300 x 50 mm

colours red/green/black/grey

EUROFLEX® Step Blocks

- edging of jumping pits and playgrounds
- boards and peripheral enclosures around sports surfaces
- stairways, e.g. for downhill slopes or slides
- spectator standing or seating areas
- customized seating arrangements

dimensions	1,000 x 300 x 150 mm
	1,021 / 785 x 300 x 150 mm (1/8 circular arc section r=1 m)
colours	1,000 x 240 x 120 mm
	standard: red/green/black/grey EPDM: see page 3, EPDM-coated on 3 sides (long sides at the front, top and rear)

EUROFLEX® Lawn Edging

Ideal bordering for impact protection slabs, sandboxes, walkways or edge trim for trees and bushes.

dimensions	1,000 x 250 x 50
colours	red/green/black/grey also available with EPDM top trim (see page 3)

EUROFLEX® Rubber Palisade

- edging for trees, shrubbery and flower beds
- support for slopes and embankments
- stairways, e.g. for downhill slopes or slides
- balancing walkways

The steel anchor extends 2/3 into the rubber palisade.
This ensures extremely high stability.

SUSTAINABILITY

Corporate Carbon Footprint, Product Carbon Footprint, Energy Management, Social and economic sustainability at KRAIBURG Relastec

Recycling of up to 60,000 t material

Every year, we process and recycle up to 60,000 tons of old tyres, closed-cell rubber and rubber production scrap.

Reduction of CO₂ emissions

By using recycled rubber granulate, we save more than 130,000 tonnes of CO₂ emissions per year compared to virgin rubber.

Corporate Carbon Footprint

The CCF was developed in accordance with the Greenhouse Gas Protocol audited.

Product Carbon Footprint

The PCF is calculated in accordance with ISO 14067 and ISO 14040/44 audited.

Energy management according to ISO 50001

Our energy management system is identified according to ISO 50001. Energy-relevant topics are taken into account in all processes of the organisation.

Certified environmental management system

Our environmental management system is certified in accordance with DIN EN ISO 14001:2015. This guarantees that an effective environmental management system is integrated and continuously improved.

Member of NEW LIFE initiative

The declared aim of NEW LIFE is to demonstrate the advantages of recycled products from End-of-Life Tyres (ELT) to the media, politicians and the general public and to motivate them to act sustainably. More information: www.initiative-new-life.de/en

Social sustainability

Acting in accordance with our values such as equal opportunities, social responsibility, respectful treatment and transparency are the foundations for social sustainability in practice.

Voluntary rating

The ecovadis rating is an evaluation of companies with regard to CSR topics. This includes ethical aspects, sustainable procurement, the environment and ecological sustainability.

CORPORATE CULTURE

Defined values, social norms and guidelines, for common action and cooperation inside and outside KRAIBURG Relastec.

Equal opportunities

We stand for equal opportunity, diversity, inclusion and religious diversity.

Strong decision-making powers

We ensure speed in process handling, faster technology optimisations and lean processes.

Social responsibility

Fair pay, collective bargaining, further training, career development, work-life integration.

Responsible for our actions

We take responsibility for all decisions and results. Error acceptance is firmly anchored in our culture.

Respect

We are honest, reliable, respectful and trustworthy towards our colleagues and partners.

Transparency

We practice open, transparent cooperation both inside and outside the company.

WHAT SETS US APART

Internationality

With an export quota of over 50%, we have already exported our products to over 100 countries.

Easy complaint management

Transparent and optimised processes ensure rapid processing.

Flexibility with customer requirements

We offer our partners customised options for packaging, labelling and delivery, packaging, labelling and delivery.

Long-term relationships

We maintain long-term relationships with our customers and suppliers based on mutual respect and fairness.

Personal contact persons

We do not hide behind support hotlines and contact forms. With us, you have personal, competent contact persons.

Product quality

Our products meet the highest quality standards. They are durable, a perfect fit and made from high-quality raw materials.

Innovation and product design

We continuously develop new products according to the requirements of our customers and the market.

Marketing support

We provide you with the best possible support in the form of images or in the design of your documents.
